pa06 Second Offer

A chance at redemption on pa06.

Take the template file from the repo located here:

~/repo201/programming/pa06/pa06-template.py

Follow the instructions to turn that template into a fully-working version of pa06 and use that as the code to build pa07. Submit *both* your redone pa06 and your pa07 on Tuesday, 13 November. Whatever you get on the redone pa06, I will *deduct* 15 points from it. Your pa06 grade will now become the larger of: (1) What you received on it originally or (2) What you got on the redone version, minus the 15 points described above. If you nail the redo, you'll get an 85 on pa06.

This offer is available if you turned-in pa06, and is completely optional. You may use your original pa06 or a template-based redo of pa06 as the starting point for pa07. If you're happy with your original pa06 grade, you just need to turn in pa07 (no pseudo-code required) on the 13th of November.
